Agenda

1. Case-1 PureFit

1. Problem Statement
2. Number of users joined or Weekly/Monthly active users
3. Retention table / Nth-day retention
4. The number of classes attended / The duration of class attended
5. Referrals and links shared / Feedbacks received
6. Match rate between user and content

2. Case-2 Indian Bank

1. Revenue based metrics
2. User adoption metrics
3. User Feedback and application records

Problem Statement :

There's a fitness company "PureFit", who has launched their new application that has various fitness related information like videos and information on how to perform certain exercises, diet management plans, etc.

→ Recorded session
→ Live classes

Customers

→ Free customer

→ Paid customer

} Freemium model.

→ Improve the retention

→ Retained if they have used the
App for at least 2 months.

User Funnel Analysis

~~1~~ Acquisition

- Discovered the App
- & Installed the App

~~2~~ Onboarding

- sign up

~~3~~

Engagement:

$$\frac{DAU}{MAU} = \text{stickiness}$$

Retention :

↳ Retention Rate

↳ Churn Rate

↳ NPS

↳ Uninstallation Rate

Retention
Table :

Nth
day =
Retention

Number of users who open the app the Nth
day after day 0

Number of users who first used
the app on day 0

Acquisition Date	Users	Day 0	Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7	Day 8	Day 9	Day 10
Jan 25	1,098	100%	33.9%	23.5%	18.7%	15.9%	16.3%	14.2%	14.5%	13.3%	13.0%	12.1%
Jan 26	1,358	100%	31.1%	18.6%	14.3%	16.0%	14.9%	13.2%	12.9%	14.5%	11.3%	
Jan 27	1,257	100%	27.2%	19.6%	14.5%	12.9%	13.4%	13.0%	10.8%	11.4%		
Jan 28	1,587	100%	26.6%	17.9%	14.6%	14.8%	14.9%	13.7%	11.9%			
Jan 29	1,758	100%	26.2%	20.4%	16.9%	14.3%	12.7%	12.5%				
Jan 30	1,624	100%	26.4%	18.1%	13.7%	15.4%	11.8%					
Jan 31	1,541	100%	23.9%	19.6%	15.0%	14.8%						
Feb 01	868	100%	24.7%	16.9%	15.8%							
Feb 02	1,143	100%	25.8%	18.5%								
Feb 03	1,253	100%	24.1%									
All Users	13,487	100%	27.0%	19.2%	15.4%	14.9%	14.0%	13.3%	12.5%	13.1%	12.2%	12.1%

Metrics

- ① NSM : Retained users.
- ② L1 : WAD, Conversion Rate
- ③ L2 : Nthday Retention, Avg session duration
- ④ OKR :
- ⑤ Guardrail metric : App Crash Rate
Bounce Rate
Uninstall Rate.

Problem Statement:

The "Indian Bank" which has been functional for the past 5 years and has an already established customer bank, just launched a new mobile application for its users.

↳ Measure the success of the App?

↳ Target (NPS) $\rightarrow > 80\%$,

Metrics divided in 3 categories :-

- ① Revenue based metrics (Impact on Bank's Income)
 - ② Adoption based metrics (User behaviour & growth)
 - ③ User Feedback & Quality metrics (User sentiment & experience)
-

① Revenue based metrics

↳ % total revenue from mobile App.

↳

② Adoption based metrics

↳

③ Feedback Metrics:

↳ NPS

Acquisition → Onboarding → Activation → Retention

NAM: % of total transactions done via App.
